<b>Additional requirements</b>	Windows Media Player, Shockwave Flash Player 11, Internet Explorer
<b>Restrictions</b>	-

## Price

This example is for free.

## Product description

This example project shows how to embed ActiveX components in visualizations. The usage of the ActiveX component (`ActiveX Element`) is demonstrated by a Web Browser, a Flash Player and the WM-Player.

## Technical description

Each ActiveX component is embedded by a visualization element called `ActiveX Element`.

The URL is loaded via the specific method of the ActiveX component by initialization and if the button 'SetURL' is clicked.
